

GRI Certified Sustainability Professional Training

Certified to Report. Qualified to Lead.

GRI Certified Sustainability Professional Training equips participants with the knowledge and skills to effectively understand and apply sustainability reporting using the GRI Standards. As corporate transparency and environmental responsibility gain increasing global attention, the ability to report on sustainability has become a vital competency for professionals across industries. According to the Global Reporting Initiative (GRI), thousands of organizations in over 100 countries use the GRI Standards, including a significant majority of the world's leading companies. This widespread adoption highlights the critical role of standardized, credible reporting in promoting corporate accountability and environmental stewardship.

The GRI Certified Sustainability Professional Training provides participants with essential tools and internationally recognized methodologies to enhance their sustainability reporting practices. By completing this training, professionals gain the expertise needed to lead their organizations toward more transparent, responsible, and sustainable business strategies.

DAYS: 4 DAYS
29/6/2025 –
2/7/2025

Zoom

What You Will Learn

Gain a comprehensive understanding of the structure, purpose, and application of the GRI Standards, including the Universal, Sector, and Topic Standards.

Develop the ability to report on human related issues in accordance with the GRI Standards, including understanding due diligence processes and disclosure requirements.

Learn techniques to improve the quality, transparency, and credibility of sustainability reports, ensuring they meet stakeholder expectations and regulatory requirements.

Apply the GRI reporting principles to identify material topics, engage stakeholders, and compile sustainability reports that reflect organizational impacts.

Align sustainability reporting with the UN SDGs, incorporating them into organizational strategies and reporting practices.

Equip yourself with the knowledge and skills necessary to successfully complete the GRI Certification Exam and attain the status of a GRI Certified Sustainability Professional.

What You Get?

Interactive
Sessions

Vocational
Sessions

Two Accredited
Certificates

Expert Trainers

Merin Abraham
GRI Certified Trainer

Architect and sustainability specialist with a Master's in Sustainable Built Environment (UNSW) and LEED GA.

Merin blends consultancy, teaching and project work to embed ESG principles in architecture, hospitality, healthcare and mixed-use developments across the GCC and beyond.

Yousef Abdulhadi
GRI Certified Trainer

Engineer-turned-sustainability consultant focused on GHG accounting, climate-risk management and ESG strategy.

Yousef guides manufacturing, retail and energy organisations through emissions inventories and complex ESG transformations across the MENA region.

Special Highlight in the GRI Training Program featuring an engaging Q&A with Kareem Abu Eid

We are excited to announce that Kareem Abu Eid, MENA Region Lead for RSM's ESG & Sustainability Services, will join the final session for a dedicated Q&A. With 25+ years of experience, including 16 in ESG, and an MBA in Renewables and Sustainability, he will offer valuable insights on ESG best practices in the MENA region.

Kareem Abu Eid
MENA Region Lead - ESG &
Sustainability Services
